

AMENDMENT

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please delete the Sequence Listing and insert therefor the substitute Sequence Listing submitted as text concurrently herewith through EFS-Web.

At page 4, paragraph [0016] please replace with the following:

[0016] FIG 2 shows the nucleotide sequences of the MsPRP2 genomic region upstream from the coding region, the last codon being the translation initiation codon (SEQ ID NO:1).

At page 4, paragraph [0017] please replace with the following:

[0017] FIG 3 shows the nucleotide sequence of part of the constructs of FIG 1. This includes the ribosomal binding portion and the signal sequence of MsPRP2 and the GFP coding sequence (SEQ ID NO:8).
